FOR IMMEDIATE RELEASE

Chess Worlds brings 3D chess across eight worlds to Google Play, with iPhone, iPad and Mac versions submitted to the App Store

Twenty-four opponents with names, faces and playing styles, a coach that explains its advice, lessons and more than 3,000 puzzles.

HOUSTON, TX, November 17, 2026 - Best ROI Media has released Chess Worlds, a single-player chess game, on Google Play for Android phones and tablets. Players travel through eight themed worlds on real 3D boards they can tilt, turn and zoom, or on a flat board, and face three opponents in each world. Versions for iPhone, iPad and Mac have been submitted to the App Store; their release date has not been announced. Chess Worlds is free to play with ads between games, never during one, and a one-time purchase, Chess Worlds Forever (USD 4.99), removes ads and unlocks every world.

Mitchell Clay, founder of Best ROI Media, said: "I wanted computer opponents that feel like sitting across from a person. Aunt Marigold plays differently from Sir Gareth, and the easier bots make the kind of mistakes a beginner makes, not random ones. With a coach at your side and eight worlds to travel through, getting better at chess should feel like a journey, not a test."

Each world, from Classic Wood and Marble Palace to Medieval Castle, Crystal Ice, Pirate Cove, Candy Land, Ancient Egypt and the Space Station, has its own board, 3D pieces, music and three opponents. Beating a world's boss opens the next. The 24 opponents run from Pip Hollis, the Nervous Apprentice, at about 400 Elo to ORION, the Station Mind, at about 2400, and the lower-rated ones have favourite styles and make human-like mistakes rather than random ones.

Learning is built in. Coach hints show a good move and explain the idea behind it, from forks and pins to checkmates, and a review after each game marks the turning points. Twelve lessons cover the basics, from how the pieces move to castling, en passant, promotion and basic mates, and more than 3,000 rated puzzles from the public-domain Lichess puzzle database sit beside a new Daily Puzzle each day.

Quick Play lets players pick any unlocked opponent, a colour and an optional clock; Pass & Play puts two people on one device; and Customize mixes any board, piece set and opponent, with six bonus 3D sets. Chess Worlds is built natively for Android and, as one app, for iPhone, iPad and Mac, around a chess engine written for the game. It plays fully offline and needs no account.

Key features

- **Real 3D boards:** tilt, turn and zoom, or switch to a flat board.
- **Eight worlds:** each with its own board, pieces, music and three opponents.
- **24 opponents:** from about 400 to about 2400 Elo, with human-like styles.

- **A coach:** move suggestions that explain why, and post-game reviews.
- **Lessons and puzzles:** 12 lessons, 3,000+ rated puzzles and a Daily Puzzle.
- **Play your way:** Quick Play with a clock, Pass & Play, Customize and six bonus sets.
- **Offline:** no account, progress on the device.
